$N = 4$

(place 4 queens on it)

To check

now

coil

$$\min(\sqrt{1-c})$$
$$\min_{\mathbf{P}} \left( \mathbf{R}, \mathbf{P} \right)$$
$$(length - a! - 1)$$
$$(r_{--}, c_{++})$$
$$\min_{\mathbf{P}} \left( \mathbf{R}, \mathbf{P} \right)$$
$$(length - a! - 1)$$

Recurrence Relation:

$$T(N) = N * T(N-1) + O(N^2)$$

Alternative formula:

Time complexity  
lecture.

$$O(N^3 + N!) = \underline{\underline{O(N!)}} \text{ Ans}$$

$$4 \times 3 \times 2 \times 1$$

$$= \underline{\underline{4!}}$$

★ you can eliminate  
for loops with  
conditions, but then  
you need another  
variable in ans.
